

PAINT TOPPER

clip on, pour & paint!

WINNER

Your PaintTopper Guide

Fitting – Remove the paint can's original lid. Simply lift up the paint can's handle, place the PaintTopper UNDER the handle, and push down to secure.

Pouring - Paint must be poured by lifting the paint can using its original handle and supporting the base. At no point is the PaintTopper's handle to be used to lift the paint can. The product was not designed for this purpose.

Wipe under the spout immediately after pouring.

Removal - Hold the PaintTopper handle securely with one hand, and gentle tap under the PaintTopper spout with the other hand, to release the product from the paint can.

Ensure you have brushed excess paint back into the paint can, before removing the PaintTopper to prevent any paint splatter when removing from the paint can.

When fitting and releasing PaintTopper to/from the paint can, please place adequate surface protection under the paint can, in case of the unlikely event of spillage or accident.

Lid - The PaintTopper's lid is designed to lightly cover and protect the paint during breaks, it does not fit tightly enough to contain the paint if the can is knocked over and should not be used during transportation of the paint can. We recommend replacing the paint can's original lid during transportation or where there are risks of spillage.

We recommend cleaning PaintTopper after each use with a brush or cloth in warm soapy water. You may wish to use paint cleaning liquids on a cloth to clean the PaintTopper further if needed, however please ensure you rinse the cleaning solution off afterwards to prevent damage to the product.

Please use QR code on our leaflet or packaging to access a video demonstrating best method of fitting and removal.

PaintTopper is to be used only for intended purposes.

Keep away from children.

Never leave any part of the PaintTopper or its packaging unattended within the reach of children.

Do not expose to extreme heat.

Do not use sharp instruments to clean, this will damage the material.

Do not use any corrosive paint cleaning liquids to soak/ submerge the PaintTopper product as it may distort shape, and effect the materials longevity.
